PROFILE

B.Tech Computer Science and Engineering student with hands-on experience building full-stack MERN applications, RESTful APIs, and machine learning models. Skilled in Python, JavaScript, and C++, with practical experience across React.js, Node.js, Express.js, and MongoDB. Published IEEE conference paper author with research experience in predictive healthcare modelling. Strong foundation in Data Structures & Algorithms, OOP, and core CS fundamentals, with a track record of building and deploying full-stack projects — seeking a Software Engineer role to design, build, and ship scalable software solutions.

WORK EXPERIENCE

Research Intern — GNITS *Jul 2025 – Jan 2026*

- Developed and presented a machine learning research project on Heart Stroke Prediction, applying classification algorithms to analyze medical datasets.
- Built data preprocessing and feature selection pipelines to improve model accuracy and reliability across multiple ML algorithms.
- Optimized model performance through iterative testing and evaluation, contributing to a published IEEE conference paper (ICoECIT 2026).

PROJECTS

ClientSync — Full-Stack Client Management System

- Engineered a full-stack client management system spanning 4 core modules — clients, projects, invoices, and payments — with an Express.js/Node.js backend.
- Designed and built 5+ RESTful APIs with full CRUD operations and dashboard analytics.
- Developed a responsive React.js and Tailwind CSS front end, ensuring a consistent UI across 2+ screen sizes.

AI Code Reviewer

- Built a full-stack AI-powered code review platform on the MERN stack, integrating Groq's LLaMA 3.3 70B model via API to generate real-time code feedback and suggestions.
- Engineered an in-browser coding experience using the Monaco Editor and integrated the Piston API to support multi-language code execution.
- Implemented real-time collaboration with Socket.IO and deployed the application on Vercel (frontend) and Render (backend).

Smart Campus Lost & Found Portal

- Developed a full-stack AI-powered portal for reporting and recovering lost items across a 5,000+ student campus.
- Implemented a cosine similarity matching algorithm achieving an 80%+ item match rate, with email notifications and real-time Socket.IO chat.
- Designed a responsive React.js UI and deployed the application on Vercel and Render, achieving sub-2s page load times.

EDUCATION

SRM University AP, Andhra Pradesh 2023 – 2027
Bachelor of Technology in Computer Science and Engineering — CGPA: 7.95

Sri Chaitanya Junior College, Vijayawada 2021 – 2023
Intermediate (MPC) — 96.5%

Sri Chaitanya High School, Punadipadu 2020 – 2021
SSC Board — GPA: 10

SKILLS

Programming: C++, Python, JavaScript

Web Technologies: React.js, Node.js, Express.js, REST APIs, HTML5, CSS3, Tailwind CSS, MERN Stack, Socket.IO

Databases: MySQL, MongoDB

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

AI/ML: NumPy, Pandas, Matplotlib, Scikit-learn

Tools & Deployment: Git, GitHub, VS Code, Postman, Vercel, Render

CERTIFICATIONS

- IEEE Conference Paper – "X-Stroke: An Explainable AI-Using Machine Learning Model for Heart Stroke Prediction," ICoECIT 2026 (IEEE Xplore)
- MongoDB Associate Developer Certification – MongoDB University, 2025
- Oracle Certified – Java SE 17 Developer
